EXPERIENCE

Carter Bryant is a building enclosure consultant who has experience in enclosure concepts and construction practices. Mr. Bryant brings value to projects prioritizing building performance and the durability of enclosure systems, from design through construction. His skills in analytical thinking, effective communication, and dedication to resolving complex challenges contribute meaningfully to litigation and investigative work associated with building enclosure systems.

He currently holds an EIT license and is actively pursuing his PE licensure in structural engineering and environmental engineering/water resources in the state of Texas.

REPRESENTATIVE PROJECTS

Construction Administration

- Wasatch Peaks Ranch Townhomes, Condominium, Duplex, and Amenities - Morgan, UT: Building enclosure consultant to architect of record and construction period services for ski town development
- Texas White House and Hangar - Johnson City: Review of submittals for building enclosure scope of historic preservation project for the National Park Service
